The Farmer's Solution

Cleaner and Softer Water

Lower Maintenance Costs

Save Money and Electricity

Protect Your Equipment

1. 🚚 The Farmer's Solution

Clean and Healthier Water for Your Animals

The Ultimate Water Solution for Farms and Abattoirs

Clean Water = Healthier Livestock | Lower Bacteria Levels | Less Scale & Biofilm | Lower Maintenance Costs

Water is the lifeblood of your farming enterprise. For livestock farmers and abattoir operators, hard water, lime buildup, and harmful slime (biofilm) in water lines present constant headaches. The Merus Ring offers a revolutionary, chemical-free solution to restore water quality, protect your animals, and meet stringent hygiene standards.

🐄 Why Livestock Farmers and Abattoirs Choose the Merus Ring

- **Healthier Livestock & Better Growth:** Clean, softer water improves water intake among cattle, sheep, pigs, and poultry. This leads to better feed conversion and improved overall animal health.
- **Destroys Slime and Biofilm:** The Merus oscillation technology breaks down the slime layer (biofilm) inside water pipes and drinking troughs. This eliminates the breeding ground for harmful bacteria like *E. coli* and *Salmonella*.

- **Clean Calibrated Drinking Systems:** Prevents limescale and minerals from clogging fine nipples, valves, and spray nozzles in poultry houses or feedlots. Every animal gets consistent access to water.
- **Abattoir Bio-Security & Hygiene:** In abattoirs, the ring helps reduce limescale stains and mineral accumulation on meat processing equipment, hooks, and floors. This simplifies cleaning and improves sanitation standards without extra chemicals.
- **Protects Boilers and Heaters:** Abattoirs use massive amounts of hot water. The Merus Ring prevents hard limescale deposits in boilers, heat exchangers, and high-pressure washers, saving you thousands of Rands in electricity and repair costs.
- **No Chemicals or Salt:** 100% safe for both animal and human consumption. It does not alter the taste or chemical composition of the water; it simply neutralizes the harmful effects of the minerals.

⚙️ Ideal Applications in the Livestock Sector

- **Livestock Troughs and Feedlots:** Keeps drinking water cool, fresh, and free from algae and slime.
- **Poultry and Pig Farms:** Prevents clogged drinking lines and microbe buildup in intensive housing systems.
- **Dairy Parlours:** Protects milking machines, cooling systems, and hot water equipment from hard water.
- **Abattoirs:** Reduces maintenance on steam boilers, wash lines, and hygienic equipment.

💰 The Smart One-Time Investment

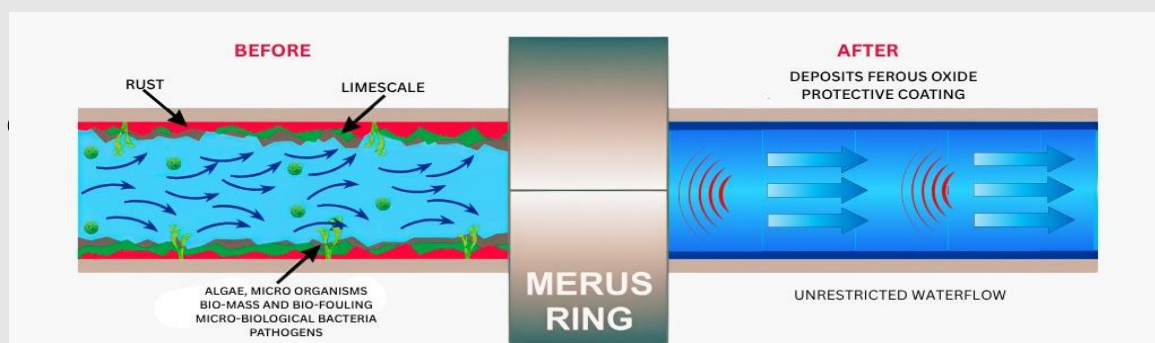

No power, no chemicals, and no filters to replace. The Merus Ring is simply bolted to the outside of your existing main water pipe and goes to work immediately.

Merus Ring – Healthier Animals. Clean Abattoirs. Higher Profit Margins.

2. 🚗 The Farmer's Solution

Protect Your Pivots and Pipes Without Chemicals!

The Merus Ring is an innovative, chemical-free water treatment solution designed to reduce the damaging effects of limescale and mineral deposits in water systems. It is the ideal solution for South African farmers, businesses, and homeowners looking to slash maintenance costs while improving water quality.

- **Softer Water:** Feels noticeably softer without using chemicals or salt.
- **Prevents Limescale Buildup:** Reduces lime accumulation in pipes, pumps, irrigation systems, boilers, and geysers.
- **Restores Efficiency:** Helps restore the flow and effectiveness of existing water systems by dissolving mineral buildup over time.
- **Extends Lifespan:** Protects and extends the operational life of expensive equipment like pumps, valves, and nozzles.
- **Cuts Costs:** Drastically reduces repair, maintenance, and replacement costs.
- **Better Irrigation:** Improves the overall efficiency of irrigation systems and water distribution.
- **No Extras Needed:** Requires zero electricity, chemicals, or ongoing maintenance.
- **Environmentally Friendly:** Sustainable, green, and incredibly easy to install.

Ideal Applications

- Farms and irrigation systems
- Livestock water supply and troughs
- Boreholes
- Households
- Commercial buildings
- Hotels and guesthouses
- Factories and industrial plants
- Hospitals and schools

The Smart Investment

The Merus Ring is a one-time investment that helps you reduce ongoing maintenance expenses and improve the performance of your water systems for years to come.

Merus Ring – Clean Water. Less Maintenance. Greater Savings.

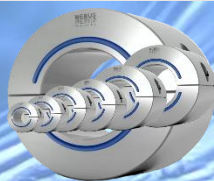

5-Year Guarantee and German Programming

The **Merus Ring** is **guaranteed to work for a minimum of 5 years** without any maintenance, chemicals, or external power sources. The device utilizes specific German programming (molecular oscillation) to prevent limescale, rust, and biofilm in water pipes.

Important Details of the 5-Year Guarantee and German Programming

- **German Technology:** The ring is manufactured and scientifically programmed in Germany. It is encoded with natural physical oscillations (frequency waves) that alter how minerals behave in water.
- **No Power Required:** The active programming autonomously broadcasts frequencies through the pipe walls. It operates 24/7 without needing batteries or electricity.
- **Factory-Recharge (Recharging):** After the 5-year period, price inflation of the ring is factored in. During this time, you do not need to buy a new ring if the existing ring is still in good condition. The ring is sent back to the factory for a recharge at approximately
- **35% of the current market price**, which fully renews the 5-year guarantee.
Why this detail is important for the client:
- **Inflation Adjustment:** The 35% fee and courier costs are calculated based on the new market price of that specific year, not on what the client originally paid years ago.
- **Quality Inspection:** As long as the aluminum housing has no physical damage (such as deep cracks or severe external corrosion), it qualifies for reprogramming.
- **Total Lifespan Expectancy:** Although the warranty is 5 years, the physical aluminum ring itself lasts up to 20 years
